Developmental Psychology of Children I

This is a course that combines classroom instruction and off-campus work-based learning placements. That means you learn about the development of children, while you actually get to work with them! Work-based learning placements take place during the scheduled class time at local elementary schools, child care centers, or preschools. Opportunities for paid after-school, work-based learning placements are also available. Throughout the school year, you will study a variety of child growth and development topics, and you will learn how to work with children ages birth to adolescence

Course Length:
1 Year/2 Periods
High School Credits: 20

Developmental Psychology of Children II

This is an advanced course in child development and education. Students increase their knowledge, experience, and job skills during work-based learning placement. Students will focus on: observation of children and programs; communicating with children, staff, and parents; planning age-appropriate curriculum; and understanding the history, theories, philosophies, and legal aspects of careers related to children.

Course Length:
1 Year/2 Periods
High School Credits: 20
