

Nursing Careers

Rev. 1.18.2023

Nursing Careers offers a comprehensive introduction to the field of nursing while studying the care of patients and the role nurses provide in a variety of healthcare systems. Focus is given to the various specialties within the field and studies include a basic understanding of the systems of the body, medical terminology, diseases, basic patient care, taking vital signs, charting, medical ethics and understanding patient privacy laws. Instruction is combined with a hands-on learning experience through instructor approved internships at local hospitals, clinics and physician offices. To learn more about this course see our course catalog or visit our website at www.tvrop.org.

Important note: Spring orientation is required in order to be enrolled in the program and must be attended by the student and parent/guardian(s).

Students can earn. . .

- 20 high school credits
- Transferable college credits
- UC a-g "g" approval (College-Preparatory Elective)
- Various industry-recognized certifications
