

AP Environmental Science

Rev. 3.3.2021

The AP Environmental Science course is designed to be the equivalent of an introductory college course in environmental science. The goal of the AP Environmental Science course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationship of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. To learn more about this course see our course catalog or visit our website at www.tvrop.org

Students can earn. . .

- 20 high school credits
- UC a-g "d" approval (Laboratory Science)
